

# *Byer i Vandbalance 13/9-2011*

TEKNOLOGISK  
INSTITUT

## **Purpose of today's FIF-meeting:**

- **Status of the various sub-projects**
- **Discussion and idea development**
- **Knowledge and information between sub-projects**
- **New input for subprojects**
- **Appointment of sub-processes we should focus on innovation**

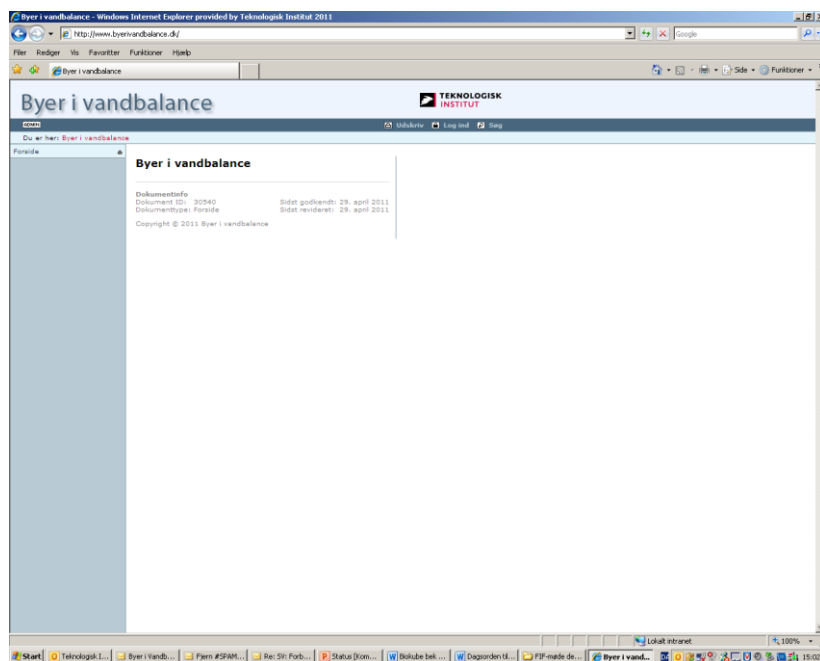

# Status

- Today is the fourth FIF meeting
- The next meeting of FIF calendar is the 30/11 at TI in Taastrup. Ulrik will/has sent meeting request
- At the last FIF-meeting we decided to splitting into smaller units
- The next steering committee meeting held in November / December
- Two of the three in phd students are now employed and will present themselves today
- Simon Toft Ingvertsen is expected to start as a postdoc, and will work together with Karin Cederkvist about water quality issues
- It is unlikely that we are going to report to RTI before January 2012. Peter, Marina and Ulrik would like to have an overview the next months.

# Homepage and documents

- There has been created a homepage [www.byerivandbalance.dk](http://www.byerivandbalance.dk) in May
- TI gets a workspace for document management - hopefully in 2012

# ***Subprojects in consortium***

## **The six subprojects:**

- **Subproject 1: Taastrup** Tests with clean water –focus at optimized infiltration
- **Subprojects 2b + 3: Aarhus** Giber Å straem and Mårslet (infiltration in clay)
- **Subproject 2a: Odense** Ryds Å, Alder svamp
- **Subproject 4a: Brøndby** Focus on the masterplan –
- **Subproject 4b: København** Transport, storing and cleaning - focus on run-off from roads
- **Subproject 5: -** Guidelines
- **Subprojekt 6: -** Administration, management and dissemination of knowledge
